Workshop on Zero-Residue Farming

One day workshop was organized on zero residue farming on 15th Oct, 2016 by M/s. Camson Seeds Ltd. at their Research & Development Centre, Dodballapur, Bangalore.

32 Farmer Producer Groups along with Dr. Vijay (Ex. Dy. Director Coconut Board & Ex. State Coordinator ISAP) , Mr. Ravi (Research Associate, CPI Cell Horticulture Department Karnataka), Ms. Padmakala (Coordinator ICCOA) & Mr. Sharad consultant (ICCOA Bangalore). Around 59 peoples have participated in the workshop.

Classroom Session

During workshop, Dr. Vijay raised concerns about negative impact of pesticides in our soil & ecosystem; he recommended for using bio & safe products of Camson for better sustainability of soil & environment. Dr. Rekha, Scientist CBTL has emphasized on biocides & hybrid seeds.

Mr. Prabuddh Mishra, Manager (Institutional Business) CSL explained about M/s. Camson Group & know-how regarding usage details of various innovative biotechnologies & methodologies regarding zero residue farming. Further, he added the benefits of using Camson's products in organic farming & emphasize on Natural Water Soluble Fertilizers.

Field Visit

After classroom session, the participants were taken for a comprehensive field visit to showcase the strong hybrid seeds portfolio of Camson. Farmer Producer Groups have shown their interest for awarded kali variety of chili & watermelon seeds developed by camson seeds ltd.

Farmer Producer Groups have expressed their thanks to Camson for organizing the Zero Residue Farming Work-Shop, they have shown interest in Camson's revolutionary & Innovative Microbial Extract Technology based products.
